To whom it may concern:

Re: Casetrackerlaw Collection Software

I have a collection practice that handles a very high number of cases. We have been using Casetrackerlaw for about 9 months. In that time, the company has worked with us to customize the program to handle the volume, and the particular forms and pleadings we use. We now use Casetrackerlaw to keep track of all of our cases, produce the vast majority of documents, including pleadings that we produce, and do most of our billings.

There has been a great level of personal attention, and the staff at Casetrackerlaw is continually working to upgrade the system to meet our needs.
